

# DOUBLE STAR - EIGHT POINTS

## Directions

1. Using white or shiny colored paper cut 4 pieces of 4 inch squares ( Fig. 1).
2. Fold the squares along a diagonal, then fold again so that the sharp ends meet at the right angle to form a square (Fig. 2)
3. Fold once more on the diagonal line (fig. 3) and cut on dashed line shown in fig 3. The result will be an 8-pointed star. Fig. 4.
4. If using paper that is shiny on one side, glue together 2 stars so that both surfaces are shiny. Using needle and thread, tie a bead to the end of the thread and push needle and thread through the centers of 2 stars. Position a second bead on the other side and knot the thread. Spread the star and adjust to give effect of three dimensional look (fig. 5). Attach a thread to one of the points to hang on the tree.
