

Make a Polish Porcupine!

1. Cut 10 or 12 circles 4" in diameter. Fold each circle in half, then again two times more. Crease edges to make outline of 8 sections. (fig.1 - next page)
2. Cut circles on creased lines, starting from outer edge up to 1 inch from the center.
3. Using a sharpened pencil place the pencil pointed toward outer edge. (fig.2 - next page)
Roll the circle around pencil and glue flaps. Points should appear sharp. (fig.3 - next page)
4. Make 10 or 12 such circles, depending on thickness of paper; string them together tightly (fig. 4 - next page) Use embroidery needle and strong sewing thread. Start with a tiny disk of cardboard to hold knot of thread, and when all circles are threaded, pull tightly; use another tiny disk and knot thread over the side of it leaving a 7 or 8 inch loop for hanging on the tree. (fig. 5 - next page)
